⁸⁾ This represents the highest possible technically realizable bandwidth and cannot be guaranteed. The actual available speed may be lower, depending on the physical conditions of the access line. A lower speed does not affect the basic monthly fee.

⁹⁾ Change to a lower bandwidth is not possible in the form of a downgrade. Change to a lower bandwidth can only be processed with cancelling the present service (normal cancellation process applies) and reapplying for service (activation fee and interruption in service applies).

¹⁰⁾ The monthly charges start on the activation date and are prorated based on the remaining monthly time frame. If the price is to be calculated for parts of a calendar month, the exact number of days for which the service is used will be calculated.
