Hardware

Item	Description
Ethernet Port	Connects HP-5101Wn to a computer or other network device via Ethernet cable.
WPS/Reset Button	Resets the HP-5101Wn to factory default settings or starts the WPS function. Reset: Press for over 10 seconds. WPS: Press for 2–5 seconds.
Group Button	Groups the HP-5101Wn with other Powerline devices to establish an encrypted Powerline network. Press for less than 3 seconds to join/establish a network, and 5–8 seconds to leave a Powerline network.

Installation

1. Always plug the powerline adapter directly into a power socket. Never plug it into a multiple socket or uninterruptible power supply (UPS).

2. Please note that 200Mbps (Edimax HP-200x series) and 500Mbps (Edimax HP-500x series) powerline adapters are able to communicate directly with one another. 200Mbps and 500Mbps powerline adapters can be used on the same household electric wiring as 14Mbps & 85Mbps powerline adapters (Edimax HP-85XX series) without interfering, but are not able to communicate directly with 14Mbps and 85Mbps powerline adapters.

Note: A minimum of two Powerline devices are required to establish a Powerline network.

The following instructions explain how to establish a Powerline network for the first time. If you already have an existing Powerline network, please follow from **Step. 2**.

Note: For best performance, plug Powerline adapters directly into standard wall sockets. Avoid using multi-socket adapters.

Note: It may be convenient to install and configure your Powerline adapters in the same room, and then relocate the HP-5101Wn to its preferred location after setup is complete.

1. Connect a Powerline adapter to your router via Ethernet cable and plug it into a power socket. The power and LAN LEDs should display on.

2. Plug the HP-5101Wn into a power socket, and confirm the power LED is on.

3. The PLC LED on both Powerline adapters should indicate first that they are detecting a Powerline connection, and then that a Powerline connection is established. See **LED Status** for HP-5101Wn LEDs.

4. Press the “Group” button on each Powerline adapter for less than 3 seconds, within 2 minutes of each other. The adapters will automatically group together and generate an encrypted network.

- 5.** To setup your HP-5101Wn's Wi-Fi, use a Wi-Fi device (e.g. computer, tablet, smartphone) to search for a Wi-Fi network with the SSID "Edimax.Setup" and connect to it. **Alternatively**, you can use the WPS button as described later in **WPS Setup**.

- 6.** Open a web browser and if you do not automatically arrive at the "Get Started" screen shown below, enter the URL <http://edimax.setup>. Select your language from the drop down menu and click "Get Started" to begin the setup process.

Note: If you cannot access <http://edimax.setup>, please make sure your computer is set to use a dynamic IP address. This is a simple procedure, and step by step instructions for how to do this can be found in the user manual.

- 7.** Select "Obtain an IP address automatically" and then click "NEXT".

Please set up the IP address of the extender.

☒ Obtain an IP address automatically

☐ Use the following IP address :

IP Address :

Subnet Mask :

Default Gateway :

Note: Advanced users who need to specify an IP address for the HP-5101Wn, select “Use the Following IP address” and refer to the user manual for more details.

8. Please wait a moment.

9. Please enter a “MAIN ESSID” – this is a name to identify the HP-5101Wn’s Wi-Fi network, which you will connect to from your wireless device. Then select a channel number (“Auto” is recommended) and enter a “Wi-Fi Security Password” between 8–64 characters, which is the password used to connect to the HP-5101Wn’s Wi-Fi network. Click “Next” to continue.

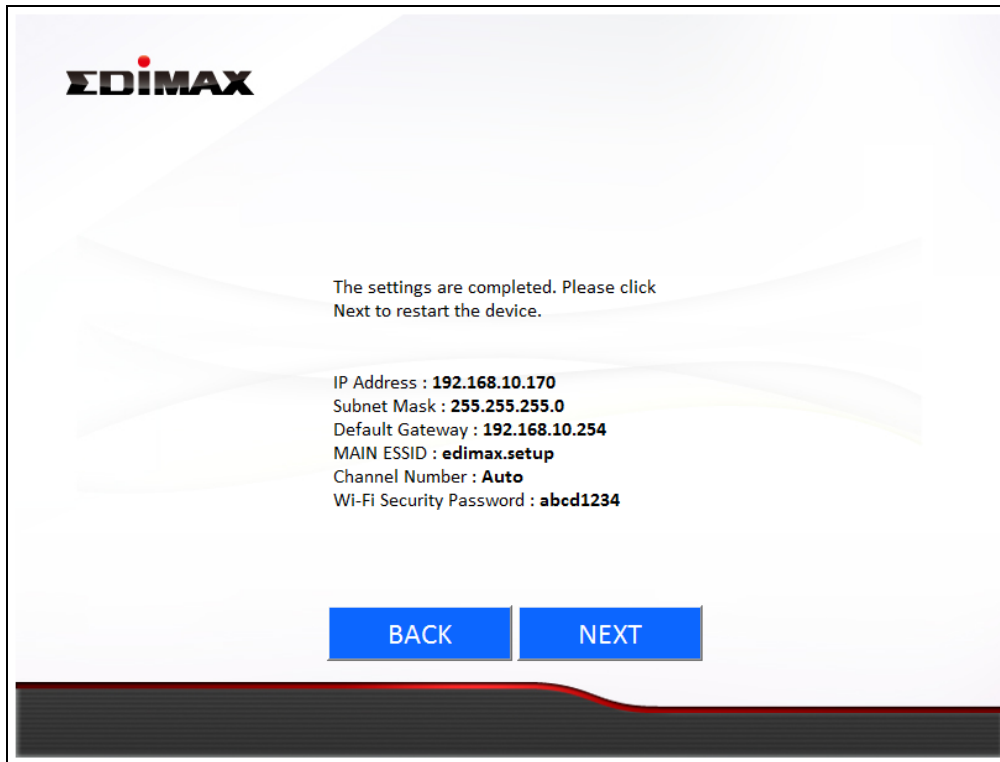

Note: Please do not forget your Wi-Fi password. If you do not wish to use a Wi-Fi password, check the box labeled “I don’t want to set up the Wi-Fi password”.

The screenshot shows the EDIMAX wireless settings configuration page. At the top left is the EDIMAX logo. Below it, the text "Please enter the wireless settings." is displayed. The form contains the following fields and options:

- MAIN ESSID : edimax.setup
- Channel Number : Auto (selected from a dropdown menu)
- Wi-Fi Security Password : abcd1234 (with a note "(8~64 digits)")
- A checkbox labeled "I don't want to set up the Wi-Fi password." which is currently unchecked.

At the bottom of the form are two blue buttons: "BACK" and "NEXT".

10. A summary of your HP-5101Wn’s Wi-Fi settings will be displayed, as shown below. Click “NEXT” to continue and restart your HP-5101Wn.

11. Please wait while the HP-5101Wn restarts.

12. When the HP-5101Wn has restarted, the following “Congratulations” screen will be displayed, indicating that wireless setup is complete. Your HP-5101Wn’s Wi-Fi should now be active and ready for use. If you need, you can relocate the HP-5101Wn to any power socket within 300m without additional configuration.

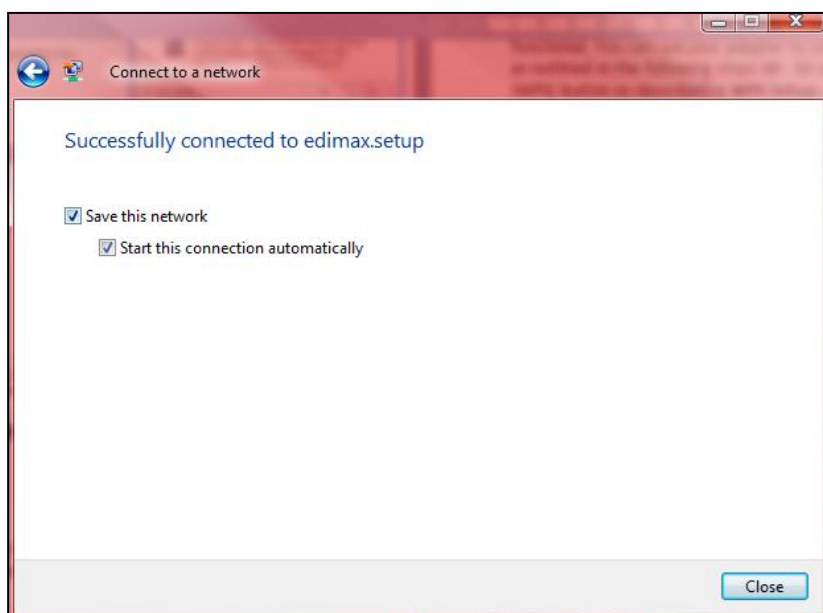

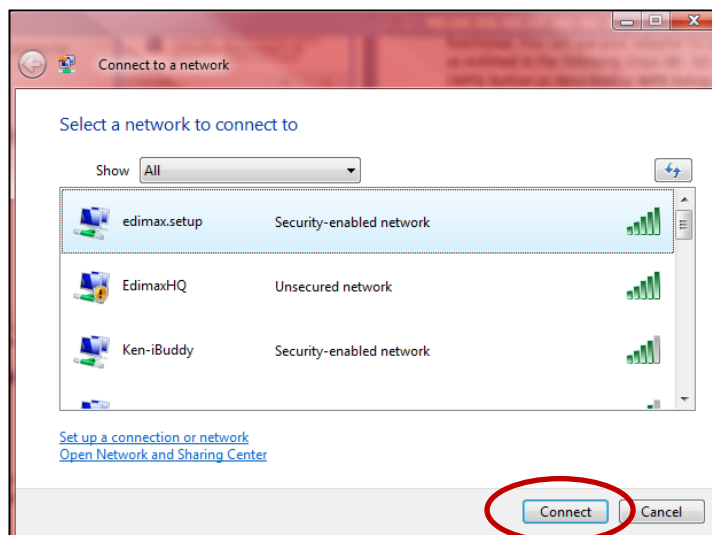

Note: The following steps 14-16 are an example of how to connect to a Wi-Fi network using Windows Vista. If you are using a different version of Windows, the process may vary slightly – please connect to a Wi-Fi network in the usual manner for your operating system.

- 13.** You can now use a Wi-Fi device to connect to the HP-5101Wn's wireless network. Click the network icon (,  or ) in the system tray and select **"Connect to a network"**.

- 14.** Search for the SSID of your Wi-Fi network, click it and then click **“Connect”**. If you set a password for your network, you will then be prompted to enter it.

- 15.** After correctly entering your password, you will be successfully connected to your Wi-Fi network.

- 16.** You can also use the Ethernet port on the underside of the HP-5101Wn to connect a computer or other device via Ethernet cable.

WPS Setup

If your wireless router/access point supports WPS (Wi-Fi Protected Setup) then you can use this method to set up your HP-5101Wn's Wi-Fi network. WPS is an **alternative** to **Installation Step 5–12**. The HP-5101Wn's Wi-Fi settings (including SSID) will be the **same as your existing router/access point**.

1. Press the **WPS button** (often the WPS/Reset button) on your **router/access point** to activate WPS.

Note: Please check the instructions for your wireless router/access point for how long you need to hold down its WPS button to activate WPS. Take care not to hold the WPS button for too long – this may result in inadvertently resetting the extender or router/access point.

2. **Within two minutes**, press and hold the WPS button for 2–5 seconds on the HP-5101Wn to activate its WPS. The HP-5101Wn's WPS LED should flash to indicate a WPS connection is in progress.

3. The devices will establish a connection. The HP-5101Wn's WPS LED should display on to indicate a successful connection. You can now connect to the HP-5101Wn's wireless network with a Wi-Fi device, as described in **Installation Steps 13–15**.

Reset

If you experience a problem with your HP-5101Wn you can reset the device back to its factory default settings. This resets **all** settings back to default.

Press and hold the WPS/Reset button for at least 10 seconds. The HP-5101Wn will re-initialize and the power LED () will display on when the extender is ready (see **LED Status**).

PowerLine Utility Software

The included CD-ROM contains Powerline utility software, which enables you to manage and configure your Powerline network in more detail.

To install the utility software, insert the CD into your CD-ROM drive and the setup wizard should begin automatically. If not, please manually locate and open the “AutoRun.exe” file in the CD. Refer to the user manual for details about using the Powerline utility software.

Federal Communication Commission Interference Statement

R&TTE Compliance Statement

This equipment complies with all the requirements of DIRECTIVE 1999/5/EC OF THE EUROPEAN PARLIAMENT AND THE COUNCIL of March 9, 1999 on radio equipment and telecommunication terminal Equipment and the mutual recognition of their conformity (R&TTE).

The R&TTE Directive repeals and replaces in the directive 98/13/EEC (Telecommunications Terminal Equipment and Satellite Earth Station Equipment) As of April 8, 2000.

Safety

This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacture must therefore be allowed at all times to ensure the safe use of the equipment.

EU Countries Intended for Use

The ETSI version of this device is intended for home and office use in Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, Sweden, and the United Kingdom.

The ETSI version of this device is also authorized for use in EFTA member states: Iceland, Liechtenstein, Norway, and Switzerland.

EU Countries Not intended for use

None.

Notice According to GNU General Public License Version 2

This product includes software that is subject to the GNU General Public License version 2. The program is free software and distributed without any warranty of the author. We offer, valid for at least three years, to give you, for a charge no more than the costs of physically performing source distribution, a complete machine-readable copy of the corresponding source code.

Das Produkt beinhaltet Software, die den Bedingungen der GNU/GPL-Version 2 unterliegt. Das Programm ist eine sog. „Free Software“, der Autor stellt das Programm ohne irgendeine Gewährleistungen zur Verfügung. Wir bieten Ihnen für einen Zeitraum von drei Jahren an, eine vollständige maschinenlesbare Kopie des Quelltextes der Programme zur Verfügung zu stellen – zu nicht höheren Kosten als denen, die durch den physikalischen Kopiervorgang anfallen.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The “Program”, below, refers to any such program or work, and a “work based on the Program” means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term “modification”.) Each licensee is addressed as “you”.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have

made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and “any later version”, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM “AS IS” WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12.
